The Rix Railroad Telephone Poles are designed to represent telephone poles used by the real railroads. The Rix Railroad Telephone Poles come in 30 and 40 foot lengths and the crossarms are made so you can attach as many crossarms as needed to the poles. The correct spacing of the crossarms are held by the sprue and notches are provided in the pole to make assembly quick and easy. Poles and Crossarms are molded in a brown plastic.

The correct spacing of the crossarms are held by the sprue and notches are provided in the pole to make assembly quick and easy. Poles and Crossarms are molded in a brown plastic.

The Rix Highway Overpass for N & HO scales is modeled after the bridges built during the 1930's and 1940's to span over railroad tracks. This style of bridge was used all over the country and is common to most people. The Rix Highway Overpass consist of 50 foot spans which interlock together so that any length bridge can be built. The piers are designed to be adjustable so that raising or lowering the bridge for different heights is quick and easy.

*Model the interior operations of a steel mill or foundry complex with these ingot buggies and molds. All of the kits are HO scale and feature injection molded parts. Ingot Buggies: These small two axle cars carry ingot molds inside a steel mill. Kits includes (3) buggies, draw bars and **wheel sets from Kadec. Kadec couplers** can be used. Ingot Molds: The large molds are used to transport molten steel within a mill complex. They can also be loaded aboard gondolas to carry molten steel from a furnace to another facility.*

Molds Are Also Sold Seperadly, Kit inkludes 2 Ingold Molds And Tools.

Rix Products is now manufacturing an N Scale Grain Elevator. This elevator represents the style of elevator used all over the country at farms and industries. The Rix N Scale Grain Elevator offers a highly detailed elevator with ladders, platforms and distribution box. The Grain Elevator can be built in 30 foot increments up to any height you wish. Color matches galvanized metal. The N Scale Grain Elevator is available separately and is also packaged as an industry called Guthrie Grain. The Guthrie Grain kit includes a 60 foot tall grain elevator, two 30 foot tall grain bins and chute tubes. Additional 30 and 40 foot grain bins are also available for Rix Products.
